# A dead simple website to help you create institutional repository in minutes

---

“An **institutional repository (IR)** is an online archive for collecting, preserving, and disseminating digital copies of the intellectual output of an institution, particularly a research institution”  
- Wikipedia

# This is for

---

Corporate groups who run Educational CSR activities

Pharma industries having educational/CSR motives

Academic institutions active in research activities

Independent research Organizations & labs

# Why?

Greatly simplifies the process of creating an institutional repository alongwith providing features found nowhere else.

## Dead Simple

The world is already complex enough, so we made this easy for everyone !  
People don't need to remember so many websites of different institutes. Here, everyone is at a single platform.

## No technical skills required

No need of expert skills, general computer & internet skills are enough.

## Socialized

Readers, institutes & organizations can collaborate with each other to make the best out of science.

## Cost Effective

As cheap as the electricity expense of a computer.

# Features

---

## Cost Effective & Fast Operations

Annual subscription available in 3 different packages based on storage space.

- 20 GB, 30 GB and 50 GB packages
- More space available on request.
- Setup repository in 5 minutes.
- Dedicated helpdesk system.

## Robust

Built on a highly secure platform, distributed across 2 global locations.

- Multiple Firewalls at network, server and application level
- Anti-malware, anti-DDOS security measures.
- Redundant storage.

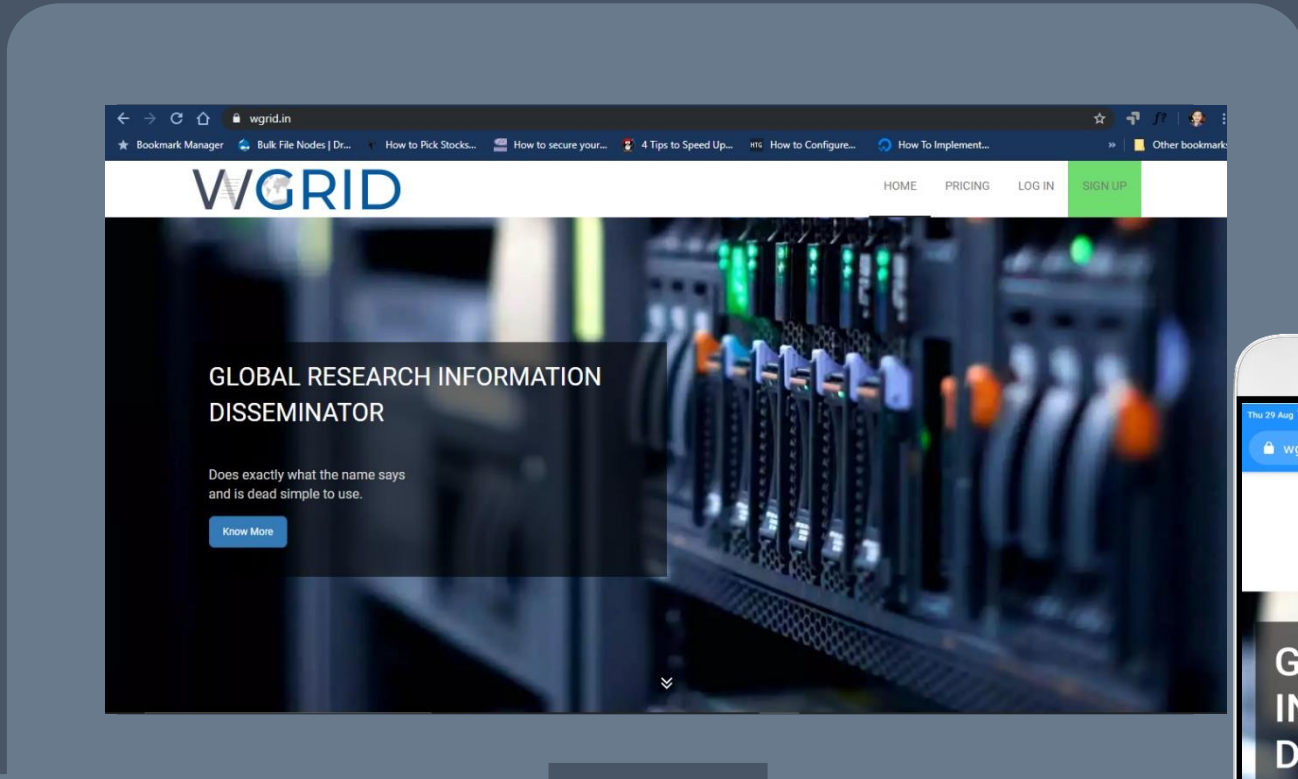

## Socialized

Everybody connects & collaborates with everybody.

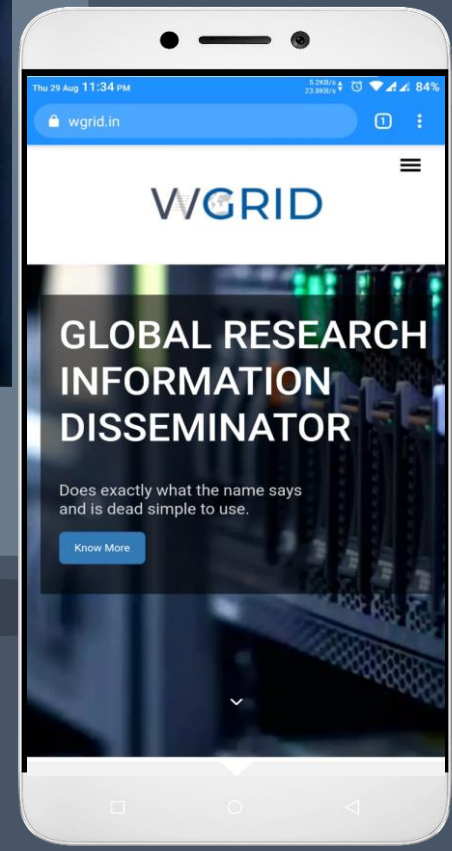

- The platform is dead simple to use.
- Users connect with like-minded people & discussions take place.
- No Geo-IP restrictions.

# We know mobiles

## Web

Compatible with all modern web browsers, no IP restrictions, accessible from anywhere

## Mobile

Complete website is mobile optimized. Use of Progressive Web App Technology (PWA) for mobile app.

# Case Study 01

---

## Colleges and Universities

People at ABC University were willing to create an institutional repository.

By choosing W-GRID, they saved their funds, time, and efforts. As an added benefit, their students are now exposed to various other repositories on the same platform.

---

## Results

- They considerably saved finances and time.
- Speedy operations.
- Forever free from technical complexities.
- Can manage the repository from office or mobile, from anywhere.

# Case Study 03

---

## Research Organizations

PQR Research Center strives to experiment, test & find new viable drugs to cure epidemics & cancer. With W-GRID, they share the newly cultivated knowledge with the whole world.

---

## Results

- They don't need to dedicate a lot of time to manage their repository; few minutes per week in fine.
- As compared to other solutions, they save huge financial resources.
- No extra man-power required.
- They get to include this under their Corporate Social Responsibility (CSR) initiatives.
